Int. J. Pres. Ves. & Piping **47** (1991) 373–374

CONTENTS OF VOLUME 47

Number 1

A Statistical Nonlinear Cumulative Damage Rule and Fatigue Life Prediction Under Random Loading 1
WEN-FANG WU & TSAN-HUA HUANG (Taiwan)

Thermal Emission from a Mechanical Notch: Calculations and Measurements . . 17
M. G. BEGHI & G. CARONES (Italy)

A General Analytical Solution of a Strain-Hardening Elasto-Plastic Plate Containing a Circular Hole Subjected to Biaxial Loading—With Applications in Pressue Vessels 35
GAO XIN-LIN, WEI XUE-XIA & WANG ZI-KUNG (People's Republic of China)

Analysis of Material Exhaustion and Damage by Creep 57
W. BENDICK (FRG)

Non-linear Structural Modeling for Life Predictions: Physical Mechanisms and Continuum Theories 79
NORMAN J. MARCHAND (Canada) & JOHN C. MOOSBRUGGER (USA)

Assessment of Environmentally Assisted Cracking in PWR Pressure Vessel Steels 113
D. R. TICE (U.K.)

Number 2

Alloy Classification of Hardfacing Materials 127
J. L. HENDERSON (South Africa) & J. H. BULLOCH (Republic of Ireland)

A Simple Model Illustrating the Conservatism of the ASME Code Procedure when Applied to the Arrest of a Crack in a Finite Thickness Solid 159
E. SMITH (UK)

Aspects of Design Codes for Metallic High Temperature Components 167
H. NICKEL, F. SCHUBERT, H. J. PENKALLA & G. BREITBACH (FRG)

Imitative Simulation of Welded Joint Fracture Under Low-Cycle Loading . . . 193
V. F. LUKJANOV & A. S. KOROBTSOV (USSR)

A New Method of Base Isolation against Earthquake Damage using Natural Material 207
SHENGWEI TANG, GERT KÖNIG & OTTO KROGGEL (FRG)

Fatigue and Microstructure in Austenitic High Temperature Alloys 217
J. BRESSERS & M. STEEN (The Netherlands)

Int. J. Pres. Ves. & Piping (**47**) (1991)—© 1991 Elsevier Science Publishers Ltd, England. Printed in Northern Ireland

Stress Intensity factors for Single and Multiple Semi-Elliptical Surface Cracks in Pressurized Thick-Walled Cylinders 247
K. J. KIRKHOPE, R. BELL & J. KIRKHOPE (Canada)

Announcements 259

Number 3

The Influence of Mean Stress or R-Ratio on the Fatigue Crack Threshold Characteristics of Steels—A Review 263
J. H. BULLOCH (Republic of Ireland)

Assessment of the Limits to the Protective Effect of Oxide Scales in High Temperature Technology, Set by Deformation of the Substrate Material 293
M. SCHÜTZE (FRG)

Threshold Fatigue Crack Extension Characteristics of a Low Alloy Steel: The Influence of Environment and Microstructure 317
J. H. BULLOCH (Republic of Ireland)

Influence of Carbon Content and Tempering Temperature on Fatigue Threshold Characteristics of a Low Alloy Steel 333
J. H. BULLOCH (Republic of Ireland) & D. J. BULLOCH (Republic of South Africa)

Modelling the Multiaxial Creep Behaviour of Alloy 800H 355
S. McALLISTER, R. C. HURST (The Netherlands) & T. E. CHUNG (UK)

Announcement 371
